

My 1B Elementary Years

What I have learned in elementary school was math I figured out how to do math I didn't understand until Mrs. Rimbach helped me understand math instead of sitting in a chair and a piece of paper in front of you, she did these **movement lessons and it helped me understand math better.**

Mrs. Rimbach helped me understand many other things, she was the teacher that helped me unlike my other teachers, they were nice but they did paper and in a chair sitting there and it didn't help, "**Moving helps the brain**" "**It lets the brain understand more**" this was quoted by Mrs. Rimbach.

She is like an inspiration to all her students, she helped all her students grow and not let anyone fail, she will help her students if they need help, she is the best teacher ever, she is my favorite teacher she helped me with many things, she is an awesome teacher. She will give a second chance, she is a perfect teacher, she will always be the best, I'm very lucky to have a teacher like her, I think that she is the best.

She gave us class pets these pets are amazing, like Mrs. Rimbach, she is my favorite teacher from many others, I also made many friends and they helped me when I needed help. She is a teacher that helped me. I wouldn't be anywhere if she hadn't helped me. She is a great teacher, for any 4th graders going into 5th grade if anyone gets Mrs. Rimbach please be kind and show respect to Mrs. Rimbach.

MY YEARS IN EVANS

Hello friends, parents, teachers and family. now it's pretty shocking that most of the 5th graders here when it was the first time coming here they were probably super nervous and shy and had no friends to talk to and now we pretty much know most of the people in 5th grade but though my times being here I learned so many things that were totally mind blowing and exiting and hard.

And for most of us we been here for about 6 years or less but though those years we must of got NP's, bad homework, no turning in homework and many bad things but good/bad i will always remember this place and especially this year

this year has been the most thrilling exciting best year of elementary now miss Rimbach has been the best teacher of elementary because she always helps us when we need help, we do super fun activities, movement lessons and i bet that she is going to change the world and every teacher is going to do what she is doing and in my past years in elementary I wasn't the best student and didn't do that good. This year im better and get get more focused on learning

I started here in kindergarten so i been learning here for my whole time i was at evans pulse is saw how evans got better and better. When evans got better i also got better and by the end of the year i reached most of my goals and i got more mature and more less of a bad kid this year.

I also started getting into more hobbies like running basketball and rap music and other hobbies like that. I learned a lot of things from my friends and peers. Some of those people made me who i am and things. The most is having an addiction to video games.and how i like reading a lot.

Evans has been the best d49 elementary school and i say that because i have friends that went to other d49 elementary schools and when i talk about my school there like what so lucky.

The school also provides us with field trips that i learned from and has got me into stuff like the galaxy and the begging of time and or field trips are most of the time really great and are super worth it and when you get back u had a good day

This is how i'm became the person i am today and how my teachers made me who am

My 1B Elementary Years

Throughout my years at Evans, my teachers have made sure that I understood everything and I was learning the right things at my level so I wouldn't get bored. They have been very helpful and made sure that we learned well. Mrs. Rimbach made our room feel like nature by adding fake grass and a wall with the Garden of the Gods and Pikes Peak.

She made movement lessons to help our brain learn better. For example, one of the movement lessons were half of the class would try to make the other half laugh and who ever got out first would have started the Boston Massacre and who was left wouldn't have started it. In my years at Evans teachers have help us learn how we can change the world and make a difference in the future. They have made sure we are paying attention so we can do things that we want in life.

While I have been at Evans they made more of a communicator because when I first started in kindergarten I didn't talk that much and now I talk more than I used to. I still don't talk that much but I talk more. I have been more of a risk taker by raising my hand more in reading. During exhibition I started to express my ideas more than I usually do. At camp I learned about how if you get too close to elk they will probably attack you. Mrs. Rimbach also brought pets into the room to help us learn better. Sometimes before a test or when we finished she would let us play with them so we would be happier and not as stressed.

At the beginning of 5th grade I made new friends. I didn't know them at all but then I became really good friends with them. I have gotten very smart and gotten very high in math, reading, writing, and social studies. Kindergarten through 5th grade has been great and I will miss this school a lot.

My IB Years

My IB years were amazing. I learned a lot about myself, my class, and my great amazing teacher Mrs. Rimbach. I learned a lot that I never knew I could do. I learned that my class was the best class i could ever have they were always there for me and when someone was hurt or upset my class would be there for them. I learned that my teacher was the best because she was nice sweet and that she did really fun movement lessons with us. She did movement lessons on every subject. My teacher, my class, my friends, and my parents touched my heart and made a difference for me because they have been there for me from the beginning especially my teacher my mom and step dad they were so sweet and caring my teacher helped me through everything i had problems with my friend my teacher, and my mom all helped me through all of it. I am a special IB student because i behave and I follow my IB attributes and i got into and amazing IB school and everyone here was an IB student two and i am glad that my teacher let me in her classroom I know I had a few ups and downs but towards the middle of the year i got better i was respectful I was kind to people who were upset and i was a communicator to everyone in my class cause when i got into problems I was a communicator and fixed them. Then when i did exhibition I had to be a really good communicator with my group because we had to work together and get everything done and do it right. Seven really important people who touched my heart this year were My mom, my step-dad, stephanie, carly, rebekah, Mrs.Rimbach, and larissa. These people touched me because they were nice sweet and caring and they were always there for me. When i was hurt or upset all my friends family and teachers were there for me. Mrs. Rimbach had a student teacher and so she was our student her name was Miss. Hoss and she was nice. I also learned a lot about how to make a difference in myself and other students and when i made those differences i felt like i was so happy and amazed.

My Years at Evans

Throughout my Evans year i have learned that everything that teacher teach can be fun, like Mrs. Rimbach she makes us do fun movement lesson that makes us have fun with friends and have a great time.

She makes her classroom like it is outside so she is very creative and that makes me like were going camping. She makes sure that we are having fun while doing our work. She makes us learn about each other, let us have second chances, and let us have partners or groups. She always get really fun and makes us corporate and gets excited and that's what i like about Mrs. Rimbach.

Friends they always have fun and make me laugh...easily. They make my day when i'm down when they or I need help they'll be there for me and i'll be there for them. I will always stand up for anybody when they are being picked on or being bullied and that made me always caring they say thank you for standing up for me and that brings pride to me. I make sure that I make them happy everyday and I give them 5 chances if they lie to me.

I love it here at evans, I get to meet new students new teachers, make new friends, everyday I always want to be here everyday. I wish i will never leave this place just to be here with my friends and teacher I know. Not everyday but sometimes we get to do fun project that i didn't' wanted to do in the beginning of 5th grade but after test and literacy and math and all that, i like and decided to do my best on the test or project. Every teacher i had throughout the years of EIES they had inspired me to be a fun little girl to be a caring, helpful adult in the future. I love my teachers that inspired me and had me in their class. They taught me my 123, taught me how to do multiplication, division, and how to have fun and be yourself, all these things and personalities that i have now makes me who i am as a friend, a student, and a person. They want to know that they are teaching us right and making sure that they are doing their job, that shows that they care about you and what you are learning.

We make mistakes and they make mistake and they are learning from them. They care about us and we should do they make sure that we are safe and following that rules.. To me i think they are risk takers and giving teaching a chance they might want to meet new students that they never met before. Even though in the beginning of the school year everybody didn't know each other and were all complete strangers but in the middle of the school year were all became friends and understood what we dislike and like. To me, school is a place where we can all be at and learn and learn about each other. This school brings me the happy vibes everyday when i walk in. Everytime i just want to start anything with my favorite teachers throughout these years. I wish that i

Larissa H. April 19

Through out the 2 years I have stayed at Evans international Elementary school, 5th Grade was my best year. What made me think 5th Grade was my best year, was my teacher because she tried every thing in her power to help us learn better. What my teacher did for us to learn better was do movement leasons, turning our classroom into nature room, what I mean by turning our class room into a nature room is she had someone paint the wall all naturey and made a grass area with fake grass, logs, horns and cow bones in the corner. she made the center tops make in look like wood and also made the lights look like clouds and a night sky. We also have pets in our room, they are two female rats, but we still haven't named them though. My favorite thing I learned in 5th Grade was everything about how living things work like animals and Humans. And that was my favorite things about 5th Grade.
